INCENTIVE CRUISES

Nowadays, when competitiveness is a challenge we must meet daily, have you ever thought of organizing an event to motivate your sales force, or achieve aggressive targets by offering some kind of special price, or simply arranging a meeting of managers or distributors?. In this area, Skorpios Cruises offers you the alternative of these Cruises to the Glaciers of Chilean Patagonia as the best idea to support achievement in your company. Many foreign companies have chosen this alternative offered by Skorpios, hiring our services for their corporate or motivational cruises, and obtaining excellent results.

Skorpios Cruises, with more than 30 years' experience in this kind of cruises, has developed a new type of tourist service with these 2, 3, 4 and 5 days Cruises, which have been tailor-made to your requirements as a client, and which also offers you an extremely convenient all-inclusive budget; furthermore neither you nor your company need to worry about anything on this cruise, as everything is organized and prepared beforehand - from rooms and equipment for your presentations, cruise accommodation, comprehensive catering - to the final dinner party.

It is absolutely clear that it is increasingly difficult to choose a venue for your convention, incentive or congress, as places are scarce and the great cities or classical destinations offer outside distracters that make it difficult to control and manage these events. Nonetheless, while on a Skorpios Cruises, you will have the absolute certainty that everybody will be there, that everybody will listen your corporate message, and that there will be no absentees or untimely unscheduled meetings, so the objectives and success of your meeting are guaranteed.

To hold an event of this kind in a unique and exclusive venue is your best guarantee of success. Don't organise this kind of event for formality's sake, you will waste your money and run the risk that your clients or guests will not appreciate your efforts.

Furthermore, Skorpios Cruises will always have one or more options open for your company, with other cruise alternatives that give you a professional and personalized solution to your requirements for a real motivational cruise for your company.

THE CRUISE AND ITS SURROUNDINGS

Welcome to Motor Vessel Skorpion III, which will take you on this 4-days and 3-nights tour of the Kaweskar Route, Glaciers in Southern Ice Field, sailing through fjords and channels in this sea that is peppered with islands; where glaciers and volcanoes draw a picture of absolutely virgin nature and where the strength of this Patagonian landscape gains force through its majestic and dense forests, with their mosses, lichens and underbrush that provide the environment for a fauna rich in birds such as the condor, royal cormorant, black necked swans, coscoroba swans, rheas, and other wildlife like foxes, guanacos, pumas, huemules, tunas, sea wolves, among others, who share this vast territory of indescribable beauty but also of enormous fragility. Skorpion offers to take you to this magic land and visit the Amalia and El Brujo glaciers, and the Calvo and Montañas Fjords, where we will walk along paths, contemplate the glacier and its front and moraines and sail between coloured ice floes on special expedition vessels, like the Capitan Constantino. During this cruise we will have the chance to take a close look at the flora and fauna of Chilean Patagonia, which still remains in its virgin and original state... we invite you to enjoy it.

NAVIGATION TRACK

KAWESKAR ROUTE

Glaciers in Southern Ice Field.

Day 1: 11:00 hours. We sail from the Skorprios Terminal in Puerto Natales. Sailing through the Ultima Esperanza Sound, Almirante Montt gulf, Angostura Kirke, Morla Vicuña pass, Union Channel to arrive at Taraba Sound at **17:00 hours**. We go ashore here on excursion boats to tour this beautiful landscape and appreciate its dense Magellanic vegetation, birds and high mountains. **19:00 hours.** We continue to sail the Collingwood and Sarmiento channels.

AMALIA GLACIER

An experience that fascinates passengers who love to explore and visit unique places, the long silhouette of Amalia Glacier comes down from the Andes Mountains, finally embracing the Reclus Volcano. It has impressive blue peaks of up to 100 metres in height and a width of up to 3 kilometres, and incredibly beautiful and varied ice floes that contrast with their rocky surroundings, which bear evidence of the first signs of moss. The Motor Vessel Skorpios III will approach this area slowly, crossing along its entire front in order to offer a panoramic view of this marvellous glacier.

THE SKORPIOS' MAGICAL PATAGONIA

EL BRUJO GLACIER

Sailing through the Patagonian channels we come to El Brujo Glacier, an enormous ice wall that has a side that has been smoothed down by ice over the years. Passengers go ashore on excursion boats to observe this Glacier; they reach land on a rock known as "Garbo", which provides sure footing for trekkers and enables them to understand how glaciers advance, burnishing these rocks as years go by. The peaks of this natural amphitheatre are always snow-capped and its slopes are covered with abundant trees and vegetation.

CALVO FJORD

This is a natural amphitheatre of the Route of the Glaciers, located in the midst of the Southern Ice Field, in the Andes Mountains and is one of the most untouched and beautiful areas in Patagonia. This is where we will feel the strength and majesty of this place which leads to contemplation and prayer. We use the Capitan Constantino icebreaker to visit the Fernando, Capitan Constantino, Alipio and many other glaciers that are at the end of the inlet of the fjords. This is where we will toast with a whisky and age old ice, a Skorpios tradition of many years.

THE SKORPIOS' MAGICAL PATAGONIA

MONTAÑAS FJORD

This fjord is located on the southern part of the Southern Ice Field and contains many glaciers. We will go ashore one morning on Bernal Glacier, to walk along its base and cross a turquoise lagoon made from its melting ice. We will here see the different stages in the life and death of a glacier, walk along its front and lateral moraines and see how it melts. We will see how flora starts to colonise this place and trees begin to take over territory that was originally occupied by the age old glacier ice.
